KARAGWE

RE: ANTIDUS ARODIUS M 5yr

The above named patient is referred to you, for more investigation and expertise management.

BRIEF HISTORY AND PHYSICAL FINDINGS, LAB. INVESTIGATION DONE

The above mentioned young boy came to our health facility with history of abdominal swelling. Abdominal was done and found bilateral inhomogeneous renal mass consistent with bilateral Wilms' tumor. In view of this I decided to refer for more expertise management.

PROVISIONAL DIAGNOSIS:

BILATERAL Wilms' Tumor

We request your feedback on the same.
